Office toy

From Wikipedia, the free encyclopedia

An office toy (also executive toy or desk toy) is a novelty item typically placed on the desk of a corporate executive or other office worker. They have no work-related function, but are usually interesting to look at and entertaining. [opinion] Office toys can be intended to provide decoration or pleasure, relieve stress or inspire creativity. [1][2] The Newton's cradle is a classic example of an office toy. [2][3]

#### Functions [edit]

Different types of office toys provide different needs to their users. Although providing pleasure and being decorative could be the two major functions in office toys, there are still some differences between each types of office toys. For example, puzzle-type toys can also help inspire creativity. Design curator Donald Albrecht described executive toys as "aspirational" objects, "less tools for provoking creativity than foghorns of identity and status in a sea of corporate homogeneity."[2]
